Dr. Bhavana Prasad, MBBS, DNB(Psychiatry)

Consultant Neuropsychiatrist

Specialist in Child Psychiatry, deaddiction,

Motivational speaker

Assistant Professor at Shridevi Medical Sciences and Research Institute, Tumkur

I am a dedicated and compassionate doctor specialized in Neuropsychiatry, with a work experience of 8yrs in the field of Psychiatry. I have had a great opportunity to work at the prestigious medical college in Bangalore, St. John,s hospital in the department of child Psychiatry for one year. I have many publications in psychiatry journals, also conducted several webinars.

I have conducted several webinars and has published articles in journals of Psychiatry .

I have been trained in diagnosing and treating various mental illnesses like depression, anxiety, OCD, alcohol and other illicit drug abuse, personality disorders and childhood psychological problems.

Along with treating patients with mental illness, I have a passion for community psychiatry. I have conducted around 30 various awareness programs across different sectors like primary doctors, teachers, lawyers, anganwadi workers, women self-help groups etc in the last one year. These programs were conducted to increase awareness about mental illness and to decrease social stigma attached to it.

I have also been regularly conducting sessions for students at various schools and colleges in Tumkur district. These sessions mainly focus on stress management, personality development, developing coping skills, drug abuse, suicide prevention and other adolescent psychological issues.

I have been recognized and felicitated by Rotary inner wheel organization, Tumkur for my work.

I believe in the saying "prevention is better than cure". And like any other illness even mental illness can be prevented if we learn to maintain good mental health. The first step towards this is acquiring knowledge about mental health, mental illness and removing stigma towards mental illness.
